Players first create their characters by selecting race, gender, and class, then set up their character's appearance by customizing their weapons and armor. Equipping various items and the characters' gender determines their stats, such as attack power, defensive power, and magic power. On the field of battle, the party attacks by tapping the right stick and controlling one of the three characters at a time to target enemies with skills. If your character succeeds in hitting an enemy, special damage will be dealt and your character will receive the "Attack" effect. The game supports various battle scenes, such as one-on-one battle, group battle, team battle, and item battle. For example, in a fight in which a party of four characters is engaged in a one-on-one battle with multiple enemies, depending on the battle scene, the players' characters can use various skills. In a battle scene, the player can switch the party members' orders to unleash special attacks or enhance their weapon skills. In a battle with multiple enemies in a group, the players' characters can quickly attack each enemy in turn by assigning the characters to attack without switching. As you progress through the game, the appearance of your character will gradually change. You can also attack enemy characters in the distance to enhance your attack power. Furthermore, the heroine Alsa is a powerful ally to your group. The game's main features include the following: – A wide variety of action scenes and battles – Various party play supported by an effective battle system – Various landscapes to explore and fight in – Easy control that allows you to focus on the action – High level of immersion θ
