How To Crack:

The Game Dark SASI The REGRESSION Shield will email you a activation key so is noted for all players needing to activate the game. This key will also work for the Import Games tab on the server.

Once activation key has been received then your zip file will need to be cracked. First download and crack the game then open up from your archive, then copy the sasi.sha1 file from inside of the folders inside to the working directory(typically

C:\Users\YOURUSERNAME\AppData\Local\ASIBAudio\ and paste it directly into the directory for Dark SASI (or copy and paste into “the opening of Dark SASI”-in other words, it should be the first thing you see after unzipping the folder). Try installing via Synaptic, don’t worry about downloading the game from the software center. It is there for you to download, not install, but you can download via a 3rd party site as that is the best way to ensure a totally functional install.

Next open up SASI (if you’re going to start there then you already have it opened otherwise try opening up the SASI directory inside of where you pasted your sasi.sha1 file into: C:\Users\YOURUSERNAME\AppData\Local\ASIBAudio\Sasi\Dark SASI.sh

Now you’re going to need run the game (it’s the next step) and the game is going to ask for administrative permissions and that’s fine (YOU’RE AN ADMINISTRATOR).

After you’ve run the game once the install is complete the game allows you to open the install log so you can find a link in the game’s folder, in the Log tab, titled “ASIBAudio.Log.DKN3D?shadow=1&Y-2311BWE” It will have instructions to click on the link to view the Log, but for help and troubleshooting purposes if you can’t locate the Log you created then go into the directory for SASI (Dark SASI this time) click and open the Log.txt file.

You'll see information about what you have, what you need to do, how to download
