Why Kaizen? Kaizen works, delivering sustainably means working more efficiently and more sustainably. It is defined as changes to be continually executed through activities that work in the interest of the human kind. By nature, this is highly challenging, and nobody can keep up with it without the working place becoming sustainable. This calls for a slow process of continual improvement, for sustainability. This is Kaizen. Fast is not good in Kaizen, and slow is not bad in Kaizen. The faster you work, the faster you will get to better quality. For a long time, people have been suffering from a typical disease: mess. It is called mess as it is the nature of things to be cluttered and ugly, with no apparent reason for being so.. Our natural interest is not to do things in a fast manner but in a more sustainable manner. Both living in this materialistic world and doing the work of a worker, a trade, a profession, etc. Fast is often not good, but sustainable is good. When you work, do you ever notice anything like this?.

---

Change from being superficial to being more sustainable. This is a journey, for it will not happen overnight. Sustainability means that we are the master of our own destiny and work towards achieving a job which is a fruit of our own effort, and not one that it put in our hand for us to do. To obtain an unoccupied and comfortable future. Only when our work and work environment becomes sustainable, then we will be in the position to achieve this direction and purpose. It is not very difficult to describe Kaizen. We want to be successful, we want to improve our performance, and we want to get more out of our work. We want to understand what must be done, we want to be more efficient and work sustainably. We want a better future for our children. We want to develop ourselves, not merely the skill. We want to increase our competency and ability. We want to reduce the pressure and stress of work. Kaizen is good and the only way to go with it. Let's use practical ways to work more sustainably. Let's design the perfect working place. Kaizen can be implemented in many forms. Let's examine some of the most obvious. We want to be able to get to the
