
Windows Loader V2.0.6 (x32 X64) - By Daz [DwzRG] Download Pc __TOP__

this is a simple program that will create and install a windows loader. it should be of use to all. i am pretty good at windows, and so this program is quite simple to make. you can also play the game after installing the loader, so i thought i'd give that a go as well. if you can, i'd love some help. you can read more about the loader below, and you can download it here: daz's latest creation is a windows loader that is totally different from other loaders. it's not just any loader, it's like a whole new version of the loader. it is an advanced loader with multiple functionality and features not available on any other loader. there is also a folder named boot, which is a backup copy of your current boot sector, with all the same files as the one in your current system. there is a folder named uninstall, which contains a batch file that will remove all files in the folder and replace them with the files in the boot folder. it also uninstalls winloader, but it will keep the folder so you can restore it at a later date. when you run winloader you will be prompted to select your language, then your keyboard layout and then any other options you want to change. you can even change the time zone if you want, but it can cause problems with some software. once you are ready press ok and winloader will begin the process of loading your system. the most important part of this is the config.cfg file, which is the main configuration file. this is where you define your boot options, your boot sector size and which os to boot. you can have multiple config.cfg files which you can use to load multiple oss.
